Terms and conditions of use

The Spice Speaker Model Generator (SSMG) has been created by TripleX effects for the purpose of easily creating electrical models of speakers.

It should be noted that this program is not intended for;

- i. Use when designing life support systems or anything where life may depend on its accuracy. (As if you would!)
- ii. Commercial use, without the written consent of the author.

As this program is part of the TripleX project, any model created will also be retained by the author to assess the usage of the program, get ideas for future developments, and to be made available to others as a .lib model file (Way in the future!).

Any persons who do not wish that their models be retained as part of the TripleX project can either;

- i. Refrain from using the program, or
- ii. Contact the author, citing a very good reason.

TripleX also holds ownership on any model that is created with this program; therefore the models made here cannot be lawfully sold or used for profit.

Any comments or question concerning this program should be directed to:
matt@iceamplifiers.co.uk

We hope that you will find this tool useful.
Thanks.

Matt
